

# Management System according to the Regulation on Specialised Waste Management Companies

REMONDIS QR as a specialised waste management company is voluntarily monitored and governed in the correspondent Regulation on Specialised Waste Management Companies, a regulation on the basis of the Closed Cycle and Waste Management Act.

The experts of the independent technical standards authority „ENVIZERT Umweltgutachter und öffentlich bestellte und vereidigte Sachverständige GmbH“ here employed carry out an annual site, facility, material and activity inspection within the framework of the commissioned specialised waste management company audits.

The requirements to be fulfilled by a specialised waste management company system refer to the operational organisation (organisational and operational structure), the employed managing and operating personnel (with regard to the necessary reliability, quality and quantity), the insurance cover, as well as the activity itself and the technical equipment used for this purpose (availability, functionality, safety and periodical checks).

The term management system summarises the elements of all systematic, planning, decisive and controlling measures, regulations and activities to achieve a target. These elements are covered by the mentioned available management system to meet the requirements of the Regulation on Specialised Waste Management Companies.

Since the disposal of (particular hazardous) waste by using qualified employees and systems engineering is always a scheduled service relevant to environment and safety, the quality of this service also includes plant safety and occupational health and safety, as well as health and environmental protection.

Planning, monitoring, execution, control and potential corrective measures are contents of this system to render this service.

The implemented management system is thus a procedure in which elements are organized that cover the quality, environmental and safety aspects, certified according to the Regulation on Specialised Waste Management Companies.
